INTRODUCTION

ANNA STAR is considered as one of the most reputable Saudi companies in the field of developing, manufacturing, and installing aluminum glazing windows, doors, curtain walls, skylights, cladding and kitchen cabinets to service the Saudi market and the GCC market.

ANNA STAR operation has started early 2008, and throughout the years expanded tremendously to add:

- Upstream production lines enabling more control on raw material prices & Quality. -
- Horizontal expansion with new products and options to expand its market share.

With an entrepreneurial spirit **ANNA STAR** proudly served a diverse and distinguished clientele, large corporations and small enterprises, governmental institutions, health organizations hospitality facilities, companies and residential Saudi clients and international ones.

OUR VISION

To provide superior solutions for Architectural Opening and Curtain Walls and Kitchen Cabinets through Research and Development, Innovative Production Technology, State of the Art equipment and highly motivated employees, thereby sustaining our profits and creating long term value for our investors, business partners and employees.

OUR MISSION

- ✓ To manage and further develop our expertise.
- ✓ To achieve highest operational efficiency.
- ✓ To meet our customers best expectations.
- ✓ To manage and further develop our expertise.

PRODUCTION LINES

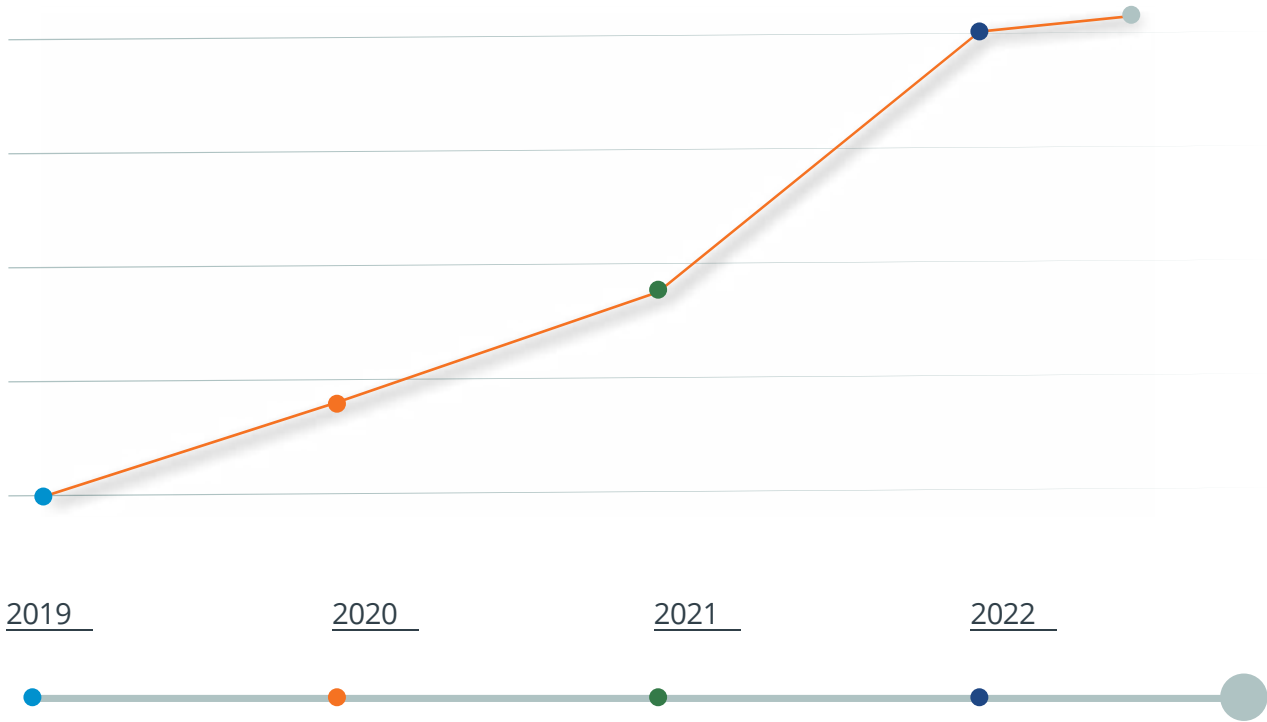

The Production of Windows, Doors , Curtain Walls & Kitchen Cabinets, consist of 5 main fabrication facilities which are:

- 1 - Standard Windows Fabrication lines.
- 2 - Non Standard Windows Fabrication.
- 3 - A curtain walls, skylights & Kitchen Cabinets and aluminium doors design fabrication line.
- 4 - Auxiliary Products Fabrication lines.
- 5 - Hardware Assembly.

AVERAGE TON PER YEAR

Year	Average Ton / year
2019	AROUND 26 Aluminum Ton / year
2020	AROUND 133 Aluminum Ton / year
2021	AROUND 212 Aluminum Ton / year
2022	AROUND 350 Aluminum Ton / year

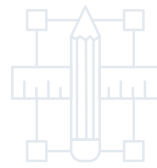

ANNA STARBUILT ALUMINUM FACTORY

PRODUCTION ELEMENTS

- 1 - Sawing machines.
- 2 - Milling and drilling machines.
- 3 - Corner assembly machines.
- 4 - Automatic bending machines.
- 5 - Die casting facility.
- 6 - CNC profile processing machine.
- 7 - CNC Aluminum sheet processing machine.
- 8 - Quality control supervisors and inspection according to the International standard specifications.

OUR SERVICES

DESIGN

Engineering software called “ORGA data” is used to match all types of engineering designs with Saudi engineering codes.

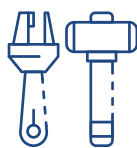

MANUFACTURE

All varieties of aluminum are produced using high-tech machinery to provide high-quality results.

SUPPLY

ANNA STAR has a substantial amount of logistical resources that can reach to client project locations.

APPLY

ANNA STAR has a knowledgeable staff prepared to offer installation services to our client in various locations throughout Saudi Arabia.

MANUFACTURING FACILITIES

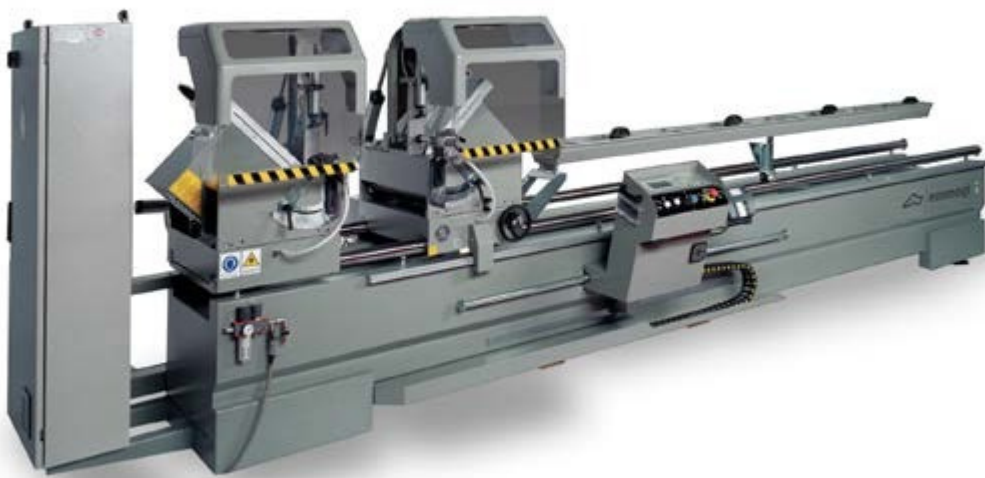

SBZ 141 | SBZ 140 MACHINE

Description

The 4-axis SBZ 141 and SBZ 140 profile machining centres enable convenient, reliable and economical machining of aluminium and thin-walled steel profiles. Thanks to the zero-edge being moved towards the front, profiles can be inserted with exceptional ease. The on-board magazine, which can be equipped with up to eight tools, provides for short tool changing times. Further tool positions are available on request. Different machining lengths, autonomous or automatic clamp positioning, work in shuttle operation: The powerful profile machining centre allows maximum flexibility in routing, drilling and tapping.

CLASSIC MAGIC MACHINE

Description

Electronic double-head cutting off machine with automatic movement of the mobile head through a C.C. motor controlled by numerical control. Pneumatic management of all angles up to 30°22' (external). 450 and 500 mm-blade. Available with a useful cut of 6,5,4 m in length.

ALUMINUM CORNER CRIMPING MACHINE

Description

The assembly of the aluminum frame by pressing without screws ensures this speed in production and a good overall shape of the angles

MEPAL SINGLE HEAD MACHINE MODEL RETTA

Description

4 Axis CNC Machining Center able to work 5 profiles faces front, Top, Rear faces and right and left end of the profile - This machine can works all required operations on aluminum profiles such as end milling, holes, copy router, thread and notching , This is to accelerate the production process, achieve the greatest accuracy of measurements, and reduce the number of workers, and the production capacity will be approximately one ton of aluminum.

ASSEMBLY TABLES MACHINE

Description

The assembly stage of windows and doors where accessories are installed

CIRCULAR SAW WITH TILTING BLADE

Description

in production

SINGLE HEAD CUTTING OFF MACHINE

Description

Aluminum cutting machine for small lengths

COPY MILLING MACHINE

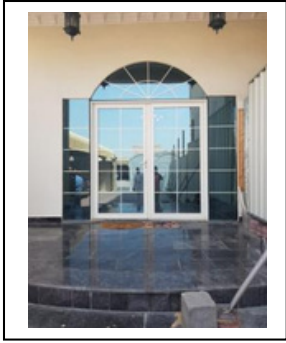

Description

Aluminum Profile Punching Machine for Hinge
Fitting - To ensure accurate fit

ALUMINUM FABRICATION

Aluminum fabrication - Doors & Windows

Frameless Glass Doors:

We offer frameless doors made of thick and high quality thin glass which are available in different sizes and shapes. We can fabricate these doors as per client's requirement. They are highly durable and very popular in commercial buildings, super stores, hospitals, residential places, offices etc.

Frameless Glass Partition:

Frameless glass partitions are a superb way to produce privacy or divide rooms without closing an area. We fabricate the frameless glass partitions by using clear glass, which is very popular with residential and commercial clients. Along with it, we also offer glass partitions for every application imaginable.

Shower Cubicles:

Our range of Shower Cubicles comes in every combination that can be imaginable, from self-contained cabinets to screen panels for bays, building into a corner or against a flat wall. A wide range of sliding and bi-fold doors are available can be easily fitted to all the various shaped shower accessories. Durable materials are used to manufacture these shower cubicles like glass, aluminum, copper, stainless steel, brass etc. Shower cubicles represent a complete shower package that offer exceptional value for money.

Aluminum Doors:

We offer aluminum doors that are very durable and reliable. Our aluminum doors show better efficiency and demand less maintenance. Moreover, these aluminum doors are rust proof, with corrosion resistant options and can be availed in reasonable prices.

Aluminum Window:

We make aluminum window by using high quality aluminum. Aluminum windows offered by us are available in various shapes, sizes, designs and colors. They are durable and require less maintenance and care. These windows are rust proof and designed as per the specification given to suit your offices, homes, stores, etc.

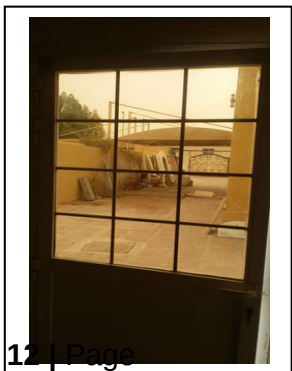

Aluminum Partition:

Aluminum partitions are being manufactured by us in a fine way. Such products are used in offices to divide the cabins of employees. We manufacture these partitions as per clients' requirements, and often use good quality of aluminum, glass and other products in making aluminum partitions.

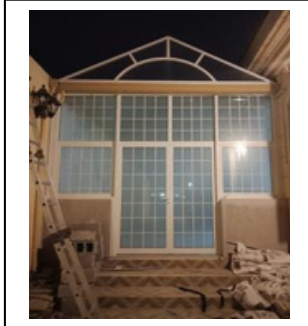

Sound Proof Window:

We manufacture soundproof windows to be used in various organizations. We design such sound proof window after getting clients specifications. They are easy to install and better for noise control, better insulation, no mess or construction required.

Spider Glazing:

We are specialized in fabricating spider glazing, and such products are made of high quality steels and glass. As soon as we receive the specifications from the client's side, we manufacture the spider glazing from them. Such products are extensively employed in different offices, complexes and malls.

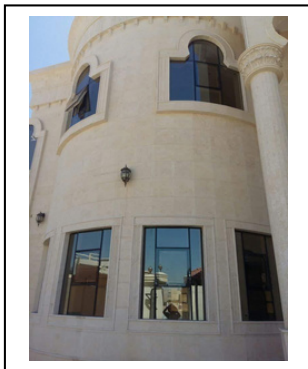

Main Entrance Canopy:

We offer the main entrance canopy in a complete range which is made of high quality stainless steel and glass. Such canopy will be easy-to install and maintain, and has been offered in a variety of designs, styles and shapes. In addition to it, main entrance canopy is customized as per the specifications of the clients.

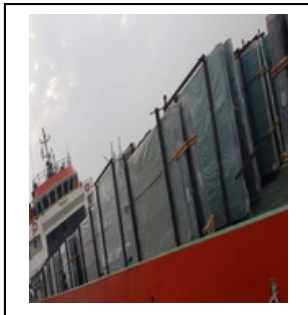

Toughened Glass:

We offer toughened glass that is safe and strength heat resistance. Such glass comprises increased strength compared with normal glass and will shatter into small fragments, rather than sharp shards, when broken. It shows enhanced thermal resistance, and breaks into small cuboids and so causes less injury.

Insulated Glass:

We offer insulated glass that takes in two panes of glass separated by a space. This glass allows no movement of outside air into the space as the space itself can be filled with dehydrated air, or with a special gas. Insulated glass can be found in both residential and business construction and it is made almost a must by building codes in many areas as a mandatory energy conservation measure.

Laminated Glass:

We also offer laminated glasses which are made of thick and tempered laminate glass layer. These Laminated glasses are used in hospitals, shopping malls and banks etc. Apart from such large uses, they can also be employed in staircases in commercial buildings.

Below are our Specialties:

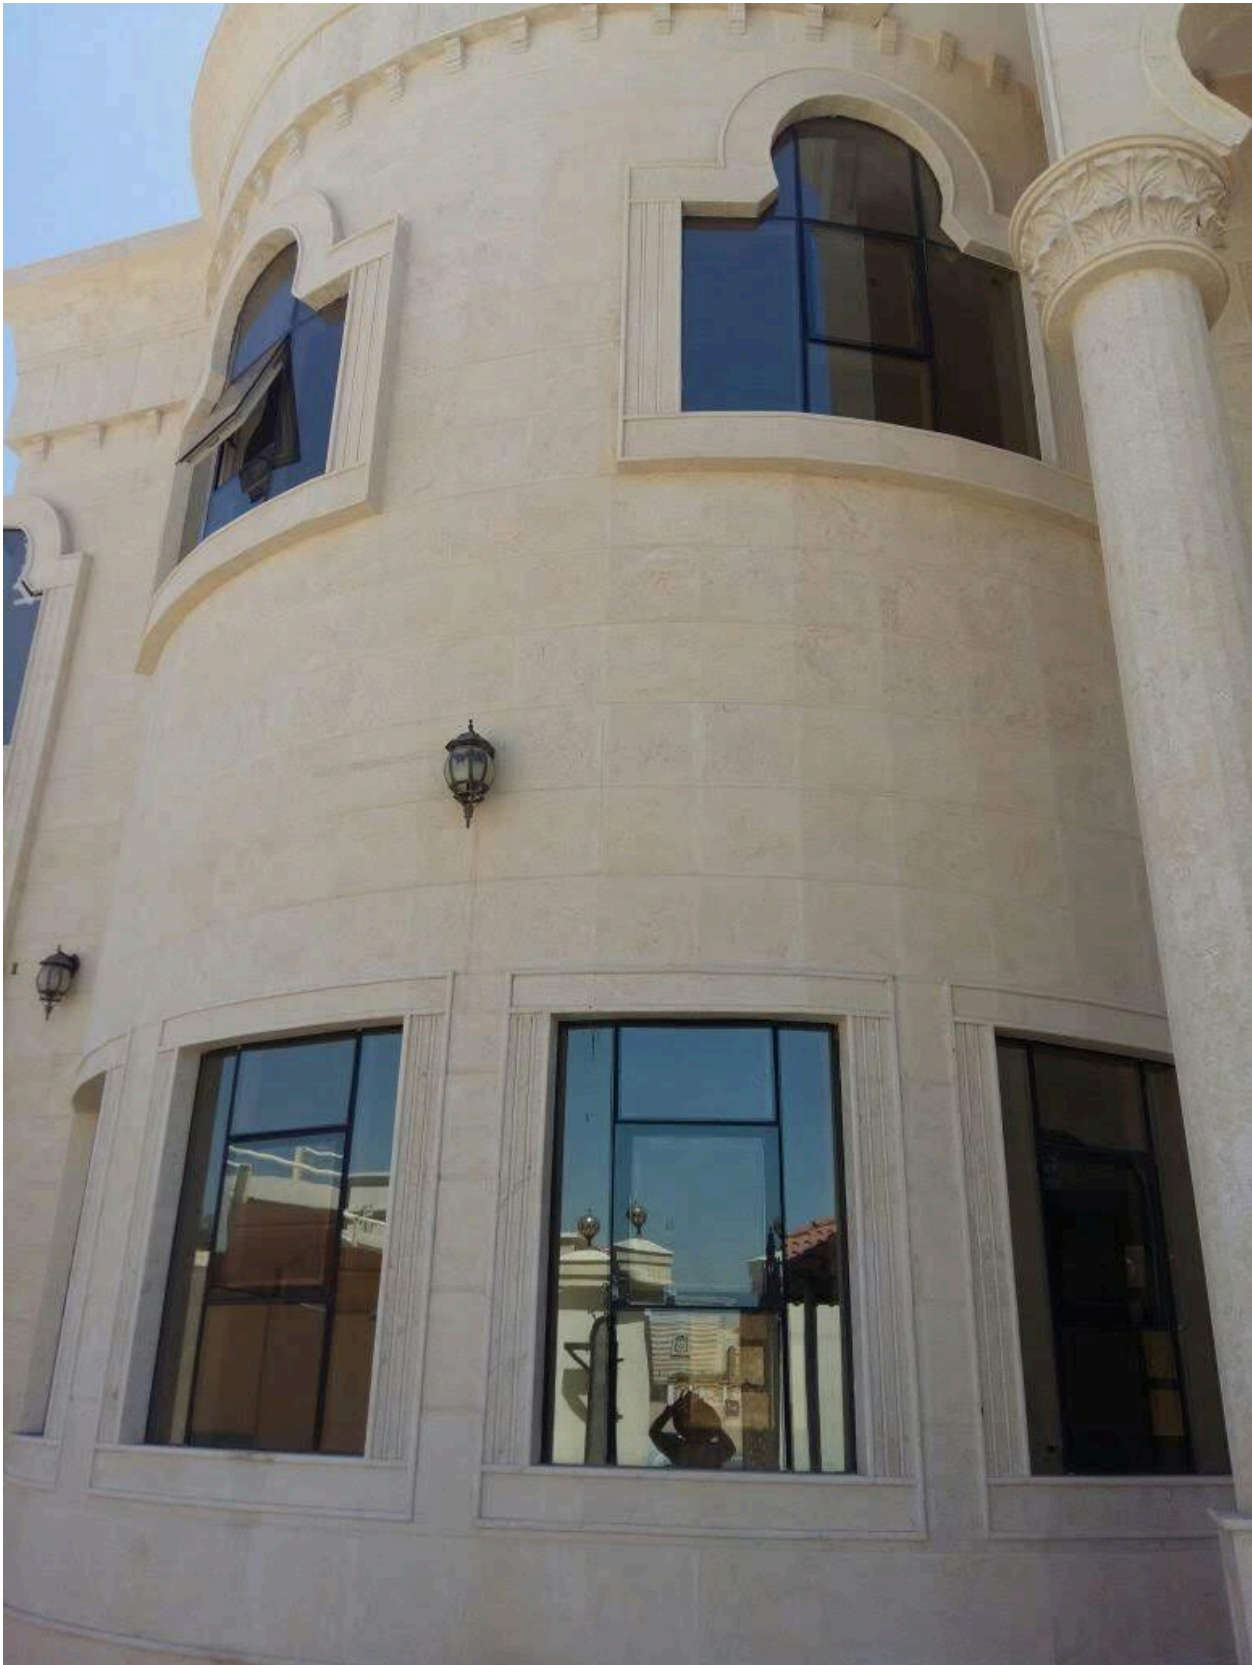

- Tempered Glass in all Thickness
- Glass Partitions for Office and Glass Doors
- Frosted Glass using Sandblast or High Quality Frosted Sticker
- Sliding Glass Door System
- Glass Shower Enclosure/Cubicle with Rust Proof Stainless Steel Accessories
- Replacement of Broken or Damaged Glass
 - Decorative Mirror Installation, Frosted Mirror, Bevelled Mirror, Silver, Grey, Brown
Mirror
- Glass Table Top for Dining Table
- Double Glazed Glass Panel Supply and Installation
- Laminated Glass for Soundproofing and Acoustic Purpose
- Handrail Balustrade Laminated Glass Installation and Replacement
- Aluminium and glass Shop Front Installation
- Stainless Steel Cladding
- Shower Screen Doors
- Glass Bonding
- Glass Joining using UV Glue for Display Showcase Glass for Clean Look
- Aluminium Door and Window
- Balcony Door and Window
- Retractable Fly Screen and Sliding Fly Screen
- Shop Front with Spider Fitting
- Aluminium Louver Gas Cylinder Box

ALUMINUM FABRICATION

Dispatch Area

Aluminum composite panel

Structural Glazing:

We design and manufacture a wide range of structural glazings that are used in corporate and commercial building construction industry. They are durable and easy to maintain and provide safety from air and water infiltration. They are used in high rise buildings to ensure stability and can be customized as per the specifications of our clients. They are widely used for window frames for buildings, shops, stadiums, complexes etc.

Curtain Wall Glazing:

We fabricate the curtain wall glazing as per clients and expertise instructions. You will be able to achieve complete flexibility with the horizontal sliding, whether it is for shop front, business entrance or partitions. Such glazing endows with a range of exterior appearances, and on the other hand is characterized by closely spaced vertical and horizontal caps with glass or metal infill panels. A finished exterior appearance and sometime a semi-finished interior might be availed with the help of such systems.

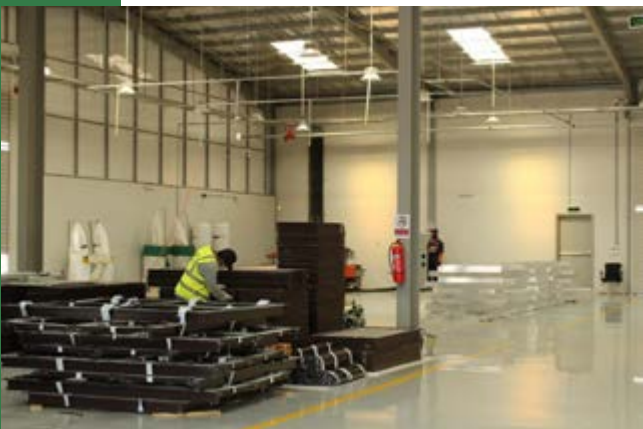

Aluminum Composite Panel Glazing:

We offer aluminum composite panel cladding that is largely used in offices, factories, shopping malls, hospitals etc. High quality aluminum is used in making of such panels, which we obtain them from Alucobond, Aludecor, Alomax and other branded organizations. As per the demands of our clients, we also fabricate ACP cladding and comprise a sort of specialization in offering best services to our clients.

QUALITY

ASSURANCE

ANNA STAR BUILT ALUMINUM COMPANY

QUALITY ASSURANCE AND THE PROCEDURE OF QUALITY CONTROL QUALITY ASSURANCE & QUALITY CONTROL

A. VISION OF THE QUALITY ASSURANCE & QUALITY CONTROL

- a) The QA/QC vision is to achieve sustained, profitable growth by business which consistently satisfies the needs and expectations of its customers.
- b) This level of quality is achieved through adoption of a system of procedures that reflect the competence of the Company to existing customers, potential customers, and independent auditing authorities.
- c) Achievement of this policy involves all staff, who is individually responsible for the quality of their work, resulting in a continually improving working environment for all. This policy is provided and explained to each employee by the Managing Director or Quality Manager.
- d) To achieve and maintain the required level of assurance the Managing Director retains responsibility for the Quality System with routine operation controlled by the Quality Manager.

B. MISSION OF THE QUALITY ASSURANCE & QUALITY CONTROL

- a) To maintain an effective Quality Assurance System complying with International Standard ISO2015-9001 (Quality Systems).
- b) To achieve and maintain a level of quality which enhances the Company's reputation with customers.
- c) To ensure compliance with relevant statutory and safety requirements.
- d) To endeavor, at all times, to maximize customer satisfaction.

DEFINITION THE PROCEDURE OF THE INTERNAL QA/QC:

Control and Follow up the set of procedures undertaken by main departments in the company like (sales, engineering, procurement and production) for the successful completion of a deal.

WHAT IS REQUIRED TO ENHANCE OUR PROCEDURE?

In order to ensure that the products and/or services are designed, produced, and delivered in a satisfying way to our customer, QA/QC shall be responsible to benefit from the company's resources and make sure the following is effectively done:

1. Enhancing the communication among departments
2. Finding out the obstacles that might cause late deliveries (in sales, engineering, procurement and production)

Generally speaking, those 2 main points are considered as the major ones that we need to focus on in order to minimize complaints and risks for all our deals.

MAJOR ROLES OF THE QA/QC ARE:

1. Satisfying our customer
2. Minimizing the customer complaints
3. Increasing the productivity
4. Decreasing the production cost
5. Facilitating and improving the internal process

QUALITY MANAGEMENT STRATEGY

INTRODUCTION

A quality management strategy to decrease the wastage is used to define the quality techniques and standards to be applied for achieving the required quality level by quality management strategy:

- Procedures
- Tools and techniques.
- Records reporting.
- Timing of quality activities.
- Roles and responsibility.

QUALITY MANAGEMENT PROCEDURES

The quality management procedure as per the Quality Manual and forms should cover the following topics:

Quality Manual

This document details the corporate quality policy and structure of the Company and references appropriate Operating Procedures.

Quality Planning

To achieve our goal to decrease the wastage by Satisfying our customer

Minimizing the customer complaints

Increasing the productivity

Decreasing the production cost

Facilitating and improving the internal process

Quality control

This during applied Quality standards, templates and forms to be employed (e.g. product description, Quality registrar), Definitions of type of quality methods (e.g. inspection) and metrics to be employed in support of quality control

Quality assurance

This during applied the Responsibility of management reviews meeting.

Tools and Techniques

Refers to quality management tools to be used and preference for techniques which used for each step in the quality management procedure.

Records

Will be including the format of Quality register.

Reporting

Any quality management reports that are to be produced

Reporting

Any quality management reports that are to be produced.

Timing of Quality Management Activities

Time of quality management activities are to be undertaken as audits or reference to quality register

Roles and Responsibilities

Roles and responsibilities for quality managing activities including program management
